

The NetX Appliance

Quickly and Easily Implement the Symantec Management Platform while saving time and money.

The NetX Appliance, bundled with the Altiris Client, Server, and Asset Management Suites, provides a single view into the deployment, inventory, monitoring, and updating of your IT infrastructure. Servers, storage, desktops, notebooks, network devices, and printers can all be accessed, creating a foundation for more advanced management functionality.

BUSINESS INITIATIVES

- **Deployment and Migration:** Automate Windows 7 system rollouts and technology refresh cycles with zero-touch imaging and migration.
- **Reduce Support Costs:** Remote diagnostic tools allow IT to remotely troubleshoot systems without requiring desk side visits.
- **Optimize your Client and Software Assets:** 25 percent of IT budgets are spent on maintaining software licenses and purchasing new hardware.
- **End User Self Service:** Empowers the end-user to quickly access IT support and initiate their own service requests, which leads to significant IT efficiency gains.
- **Automation:** Organizations can improve end-user satisfaction and reduce resource drains by implementing automated, repeatable processes.

SAVE ON IMPLEMENTATION COSTS

"I was immediately able to start doing client discoveries and report on what was in my environment."

*Meghan Stewart,
Systems Administrator,
Metrolina Nephrology Associates*

"With the NetX Appliance we accomplished in one hour what I struggled with for a month."

*Cyndi Dean Johnson
Assistant Dean for Information Technology
UNM School of Law*

CAPABILITIES OF THE SYMANTEC MANAGEMENT PLATFORM

- **Deployment:** Capture and deploy disk images, migrate data and system configurations, and change operating system settings.
- **Inventory:** Gather inventory data about computers, users, operating systems, and installed software applications in your environment. An application metering feature also lets you monitor and deny the usage of applications on your network.
- **Software Management:** Distribute software and ensure that the correct software gets installed, remains installed, and runs without interference from other software. A self-service portal also lets users directly download and install approved software or request other software.
- **Asset Management:** Track and manage physical, contractual and financial data associated with IT assets in your environment.
- **Patch Management:** Assess, prioritize and deploy updates for common operating systems and applications to ensure that managed computers are protected on an on-going basis.
- **Application Virtualization:** Virtualize applications to reduce application conflicts, testing requirements and support calls.
- **Configuration Management Database Solution (CMDB):** Model configuration items, resources, and the relationships between them in a single central database.
- **pcAnywhere Remote Control:** Quickly resolve help desk issues or stay productive while you work away from your office by providing secure, remote access to computers.
- **Data Connector:** Transfer data between external data sources and the configuration management database (CMDB).
- **Real Time Management:** Manage a single computer in real time. You can view detailed information about the managed computer and remotely perform support tasks, such as restart a computer, reset a password, terminate a process, and more.
- **Out of Band Management:** Discover computers with ASF, DASH, and Intel AMT in your environment and configure the computers for out-of-band management.
- **Barcode:** Leverage barcode scanners for a more accurate way of gathering and verifying asset information in the field.
- **Process Automation:** Create and implement automated processes that link together people, process and technology, including the ability to create end-users forms and communicate between disparate technologies.
- **IT Analytics:** Explore data, analyze trends and track IT performance without advanced knowledge of databases or third-party reporting tools.
- **Symantec Endpoint Protection Integration:** Inventory client systems for common endpoint protection products, migrate and rollout Symantec Endpoint Protection agents, troubleshoot agent problems and report on status and outbreaks.

The NetX Appliance

INSTALLED SOFTWARE

Windows Server 2008
 SQL Server 2008
 HP Client Management
 Symantec Endpoint Protection Integration*
 *Additional Integration components as released

AVAILABLE SOFTWARE LICENSING OPTIONS

Altiris Client Management Suite
 Altiris Server Management Suite
 Altiris Asset Management Suite
 Altiris Service Desk
 eiPower Saver Solution
 Arellia Endpoint Security Remediation
 Altrinsic Deploy Expert

ORDERING

Ordering our products and services is easy! **Call or email** NetX today to explore your options and find out more!

sales@netxinc.com | 1.866.NETXINC

NETX APPLIANCE BASIC

Includes Quad Core Intel Xeon Processor, 16 GB DDR Memory, Dual 250 GB S-ATA Hard Drives RAID 1, DVD-ROM, Integrated Dual Gigabit Ethernet, Power Supply, Windows 2008 Essentials Server OS and SQL Server 2008, Altiris Client, Server & Asset Management Suite Pre-installed (licensed separately). 3 year next business day on site hardware warranty.

NetX SKU:
 AHSB-04

NETX APPLIANCE ENTERPRISE

Includes Dual Socket Quad Core Intel Xeon Processor, 24GB DDR Memory, Dual 500GB S-ATA Hard Drives RAID 1, DVD-ROM, Integrated Dual Gigabit Ethernet, Redundant Power Supply, Windows 2008 Embedded Enterprise Server OS and SQL Server. Altiris Client, Server & Asset Management Suite Pre-installed (licensed separately). 3 year next business day on site hardware warranty.

NetX SKU:
 AHSE-04

NETX APPLIANCE REMOTE TRAINING

Remote setup and configuration, Priced per day. Used for additional training typically sold in units of 5 days.

NetX SKU:
 AARC-01

SYMANTEC CLIENT MANAGEMENT SUITE - 50 NODE PACK

Altiris Client Management Suite software licenses.

SYMANTEC SKU:
 21029500

LIBRARY SYMANTEC E-LEARNING

Self-paced online training courses, 1 year subscription.

SYMANTEC SKU:
 20013136
