symantec™

Installed, Running and ready to discover what's in your environment in under an hour.

Get to know Symantec NetX
The most complete IT systems management tool ever unleashed.

Do you know how your IT systems perform? … and whether they're operating efficiently?

What if you could save thousands of dollars each year to maximise IT performance? … and see a return on your investment immediately?

Symantec NetX provides an all-in-one solution for management of client devices supporting Windows, Linux and Mac desktops, notebooks and handheld computers.

You gain complete visibility and control of your IT investment.

Symantec NetX is ideal for businesses who don't have the luxury of a large IT department.

What's your cost of IT ownership? The cost of a PC is only a small part of total cost. Nearly 80% of the total cost of owning a client system goes toward the support and maintenance of the PC through its lifecycle. *Could you save on those costs?*

Powered by Altiris Client Management Suite, Symantec NetX, **deploys, manages, secures & troubleshoots** systems through the entire IT lifecycle. Gain complete visibility into your organisation's client systems so you can *see what you have, where it's located, and what state it's in.*

Symantec NetX accelerates the installation of Altiris Client Management Suite, allowing initial environment discovery *within 1 hour of setup*. Designed for small to medium businesses of 50 to 500 seats, Symantec NetX is aggressively priced and optimised for exceptional performance.

How does it work?

Symantec NetX is an **IT asset management console** to give you simplified and centralised reporting, control, and compliance of your IT assets, including license usage, software updates and security diagnostics. It's like a DIY system to finally see your IT at work.

Symantec NetX Benefits at-a-glance

WHAT YOU NEED	WHAT YOU GET
Flexible Client Management	Get complete and flexible IT lifecycle management from a single Web console and database for easier administration and reduced complexity. Easily add solutions that go beyond client systems management – without adding infrastructure.
Hardware and software inventory	See your organisation's IT profile to optimise software licenses, support end users, and reduce costs associated with operating system deployments and software rollouts.
Latest version updates of Microsoft Windows®, Mac OS®, and Linux®	Save time and support with industry-leading imaging and deployment with touch-free imaging and provisioning to migrate new hardware or the latest version of Windows® with fewer user interruptions.
Intelligent software and patch management	Deploy and update software *without manual* procedures to any PC through targeted, policy-based delivery. Use vendor-provided packages or create conflict-free packages created with Wise technology from Symantec that all conform to the corporate standard. Whether software is delivered by IT or self-installed by users, software and operating systems are current and working to enhance system security and availability.
Flexible remote assistance	Troubleshoot and fix client systems anywhere in the world. Control systems remotely or use real-time systems administration to fix problems without disrupting end users. With flexible options, IT and help desk technicians can rapidly fix problems to improve end-user service levels without having to leave their desks.
Integrated, award-winning technologies	Symantec NetX integrates the best features of Symantec Ghost,™ Symantec pcAnywhere,™ Altiris™ Software Virtualisation Solution and Altiris™ Deployment Solution from Symantec into a single, comprehensive client systems management tool. Simplify management and streamline IT administration with industry-leading imaging, remote control, application virtualisation, and software packaging technologies available in an all-in-one IT lifecycle solution.

How Can Symantec NetX help your business?

Symantec NetX is designed so organizations can proactively meet their business needs. By automating low-level functions and setting up repeatable, routine procedures, companies can more efficiently make the connection between human and computing resources. Ultimately this improves alignment between IT and their overall business. The suite reduces the costs associated with owning client systems so IT departments can gain control and focus on strategic business initiatives.

With Symantec NetX you get:

- Server Hardware
- Symantec Management Platform v7
- Client Management Suite v7
- Windows OS
- SQL Database.
